ASIA VISION TECHNOLOGY

WHY ASIA VISION

BUILT FOR *AV INTEGRATORS* & *RENTAL FLEETS*.

More than an LED display manufacturer. A reliable production and technical partner for your business.

01

Manufacturing Strength

8 IC production lines and 7 SMD placement lines for consistent quality.

Learn More →

02

Rental-Ready Engineering

Designed for demanding rental and touring applications.

Learn More →

03

Advanced LED Technology

COB and SMD solutions with stunning performance.

Learn More →

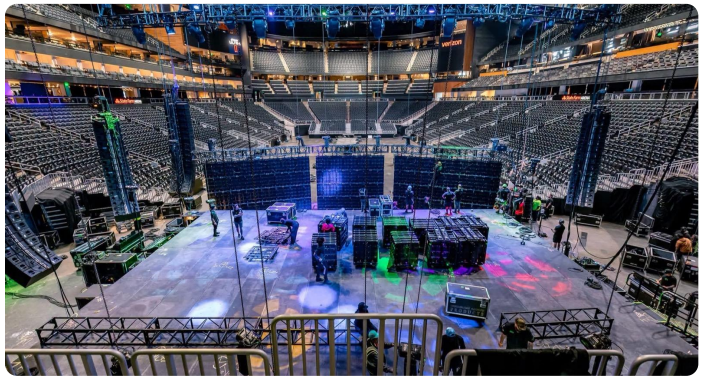

04

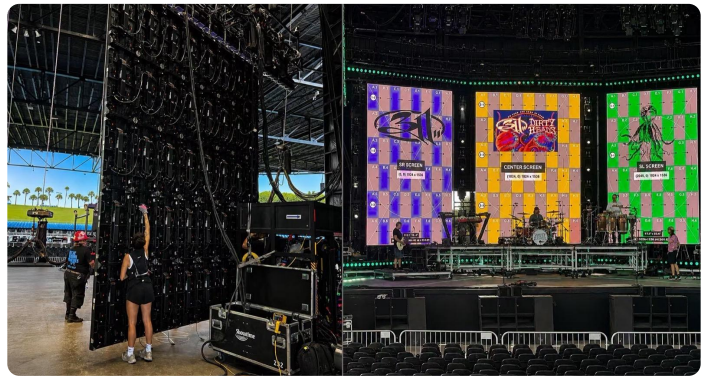

Engineering Partnership

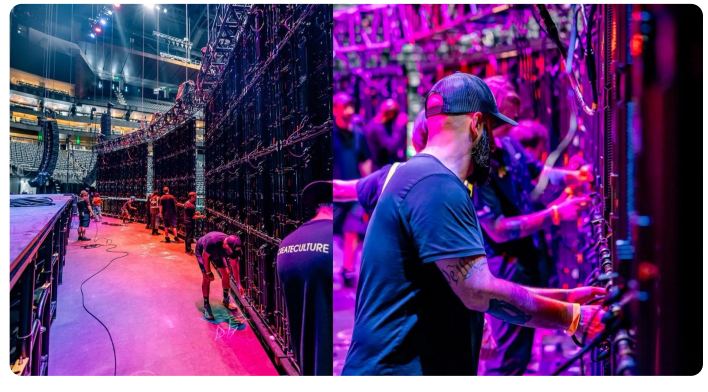

Expert support from design to after-sales service.

Reliable Quality | Flexible Customization | Long-Term Partnership | Global Support

⚡ **7680Hz Stage Refresh** Rental and touring panels run at ≥7680Hz for flicker-free broadcast and XR capture. Indoor fixed series run at 3840Hz, matched to their viewing environment.

📦 **18-Day Factory Dispatch** Goods leave our Shenzhen factory within 18 days of order confirmation. Production slots are reserved for fleet and repeat orders.

OEM & ODM for AV Partners
We manufacture under your brand — cabinet size, pixel pitch, structure, configuration and branding are specified to your project, not picked from a catalogue.

3-year warranty
Every panel ships with a 3-year warranty, backed by in-house spare-parts logistics so a rental fleet keeps working on site.

P0.78 – P10, COB / SMD / GOB
Three process platforms from a 5,000m² Shenzhen plant, shipping worldwide with batch-matched brightness and colour.

Built for Integrators
Engineering drawings, mounting interfaces and measured performance data supplied with the order — what you specify is what arrives.

为你的巡演配屏

Flexible sizing — 16:9, 4:3, 2:1 and custom

Ultra Slim Display COB

COB MANUFACTURING

Built on Our Own COB Line

Chip-on-board encapsulation, assembly and testing — handled in Shenzhen

We build COB panels on our own production line — chip-on-board encapsulation, module assembly, aging and QC handled in-house rather than subcontracted. Keeping those steps together is what lets us hold display uniformity and surface quality steady across a batch, and why a COB panel resists impact, moisture, dust and UV with no exposed lamp bead or wire bond to fail. Indoor fine pitch, sealed IP65 outdoor and wind-rated touring builds all come off the same COB process.

Our COB line — encapsulation, assembly, inspection

STEP 1 · 封装

封装 Encapsulation

Chip-on-board encapsulation on our own line — no exposed lamp bead or wire bond to fail.

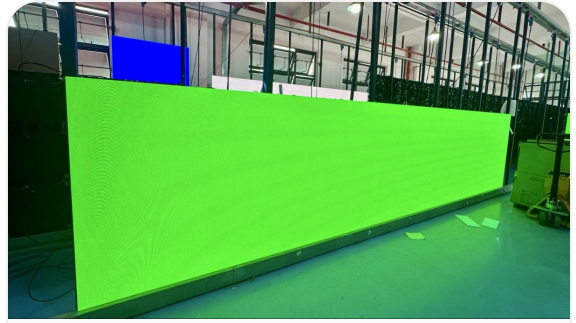

Pixel-by-pixel calibration

STEP 2 · 校准

校准 Calibration

Pixel-by-pixel chromaticity calibration — brightness and colour calibration (Chroma / LightSpace).

72-hour burn-in aging

STEP 3 · 老化测试

老化测试 Aging Test

72-hour burn-in aging for every display, plus IP65 waterproof testing.

Custom flight case packaging

STEP 4 · 出货

出货 Dispatch

Custom flight case packaging and global shipping — goods leave our Shenzhen factory within 18 days of order confirmation.

SPORTS & EVENTS

LED Displays for Sports Venues and Events

From stadium perimeter boards and arena screens to temporary event walls — specified around sight lines, ambient light and the broadcast plan, then built in our Shenzhen factory.

Stadium LED display in operation

Perimeter LED boards close-up during a football match

Perimeter LED boards showing matchday advertising

PROFESSIONAL GRADE – PERIMETER DISPLAY SOLUTION

IP65 ULTIMATE PROTECTION – BUILT FOR FOOTBALL

Every sports project starts with the venue: seating plan, nearest and furthest spectator, ambient light and camera positions. Tell us the sport and the venue — we confirm pitch, brightness and cabinet type, then manufacture and test the panels in-house.

Built Around Your Project

From cabinet design to production and testing, we build LED display hardware around your project requirements — not simply from a standard catalog.

Your Specifications → **Engineering** → **In-House Production** → **Assembly & Testing** → **Delivery**

Cabinet Engineering

Custom cabinet dimensions, mounting structures and service access designed around how you actually install.

- Cabinet dimensions
- Mounting structure
- Front / rear service

Die-Cast & Rental Cabinets

Die-cast aluminum cabinets and rental frames for fixed installation and touring applications.

- 600 × 337.5 mm & custom formats
- Rental frames
- Lightweight structures

In-House Production

Key processes run on our own Shenzhen lines — SMT, cabinet assembly, module integration and aging — for tighter control of quality, consistency and delivery.

- SMT
- Cabinet assembly
- Module integration

72-Hour Aging & QC

Every batch runs 72-hour aging plus power-on, uniformity and final QC checks before shipment, so faults surface here rather than on site.

- 72-hour aging
- Uniformity check
- Pre-shipment QC

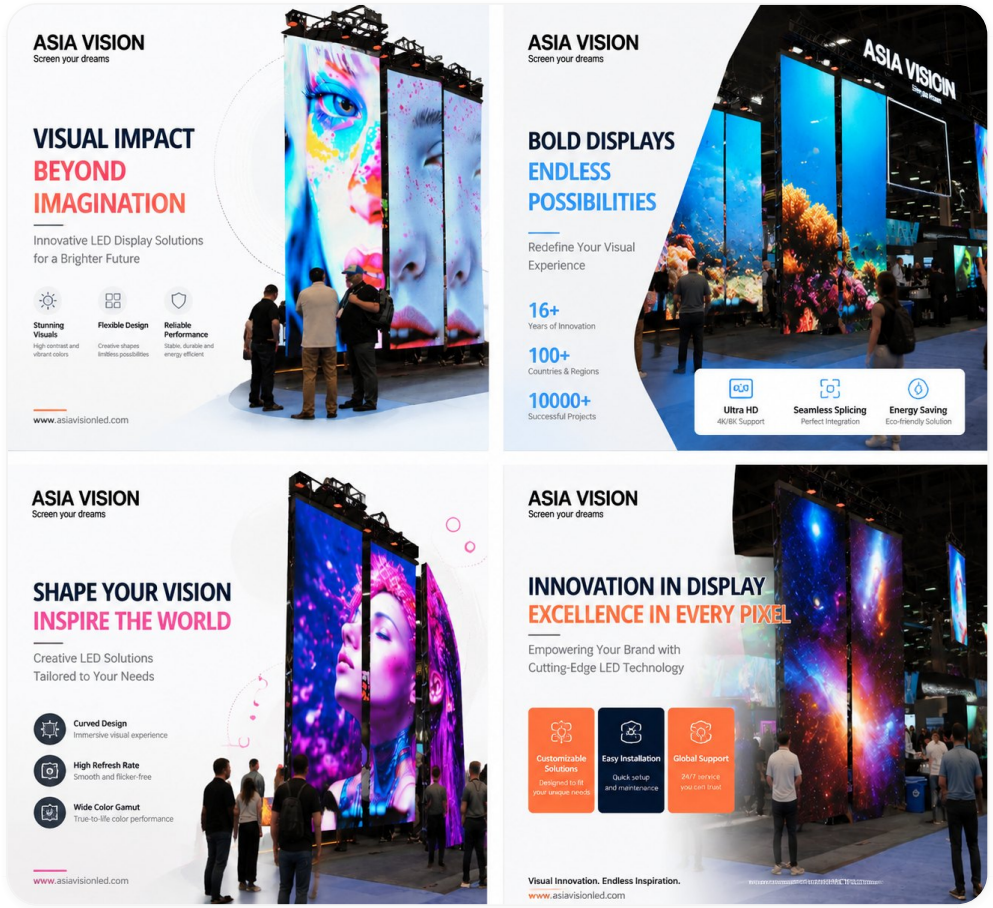

OEM / ODM Ready

Cabinet structure, configuration and branding built to your project requirements. You bring the specification — we manufacture the hardware around it, batch after batch.

- OEM / ODM
- Custom branding
- Long-term production partner

From engineering to finished cabinets — one controlled production workflow.

Discuss Your Project

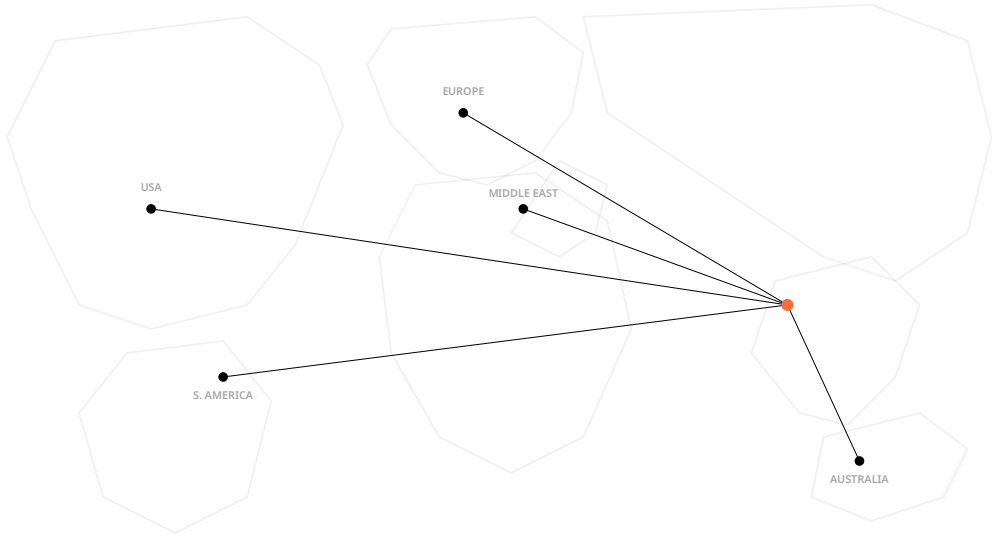

Choose the Incoterm that matches how you clear customs and how much risk you carry. We handle export documentation for every option below.

TERM	MEANING	COST / RESPONSIBILITY	DELIVERY POINT	BUYER COVERS
EXW	Ex Works	Buyer	Factory gate	Almost everything after pickup
FOB	Free On Board	Both parties	Loaded on vessel at a Chinese port	Ocean freight, destination charges, import
CIF	Cost, Insurance & Freight	Seller books ocean freight	Destination port	Import clearance, duty, delivery
DAP	Delivered At Place	Seller	Customer’s named location	Import clearance, duty
DDP	Delivered Duty Paid	Seller covers nearly all	Customer’s named location	Almost nothing
